

Bengt Mårtensson

Bibliography

Version dated January 20, 1997

Book

- [1] (Editor. With Diederich Hinrichsen.) *Control of Uncertain Systems*, number 6 in Progress in Systems and Control Theory, Boston, 1990. Birkhäuser.

Journal Contributions

- [2] The order of any stabilizing regulator is sufficient a priori information for adaptive stabilization. *Systems & Control Letters*, 6(2):87–91, 1985.
- [3] Remarks on adaptive stabilization of first order non-linear systems. *Systems & Control Letters*, 14(1):1–7, 1990.
- [4] The unmixing problem. *IMA Journal of Mathematical Control and Information*, 8:367–377, 1991.
- [5] (With Hartmut Logemann.) Adaptive stabilization of infinite dimensional systems. *IEEE Transactions on Automatic Control*, 37(12):1869–1883, December 1992.
- [6] (With Jan Willem Polderman.) Correction and simplification to “The order of a stabilizing regulator is sufficient a priori information for adaptive stabilization”. *Systems & Control Letters*, 20:465–470, 1993.
- [7] Book review: P. E. Kloeden and E. Platen, Numerical solution of stochastic differential equation. *GAMM-Mitteilungen*, pages 93–95, 1994.

Conference Contributions

- [8] Adaptive stabilization of general, multivariable, continuous- or discrete-time systems. In Christopher I. Byrnes and Anders Lindquist, editors, *Modelling, Identification and Robust Control*, pages 71–79. North-Holland, 1986.
- [9] Adaptive stabilization of multivariable linear systems. In Mladen Luksic, Clyde Martin, and William Shadwick, editors, *Differential Geometry: The Interface between Pure and Applied Mathematics*, pages 191–225, Providence, Rhode Island, 1987. American Mathematical Society.
- [10] Dynamic high-gain stabilization of multivariable linear systems, with application to adaptive control. In *Linear Algebra in Signals, Systems, and Control*, pages 610–618, Philadelphia, 1988. Society for Industrial and Applied Mathematics.
- [11] (With Ulf Holmberg and Mats Lilja.) Integrating different symbolic and numeric tools for linear algebra and linear systems analysis. In Biswa Nath Datta et. al., editor, *Linear Algebra in Signals, Systems, and Control*, pages 384–400, Philadelphia, 1988. Society for Industrial and Applied Mathematics.

- [12] Switching function adaptive stabilization with stability margin α . In *Proceedings of the 28th IEEE Conference on Decision and Control*, pages 1561–1562, Tampa, FL, 1989.
- [13] (With Hartmut Logemann.) Recent results on adaptive stabilization of infinite dimensional systems. In *Proc. of 1st European Control Conference*, pages 2067–2071, Grenoble, 1991.
- [14] Gnans — A program for stochastic and deterministic dynamical systems. In Eckard Platen, editor, *Proceedings of the 1st Workshop on Stochastic Numerics*, pages 51–52, Berlin, 1992. Institut für Angewandte Analysis und Stochastik.
- [15] A general result on adaptive stabilization by switching function controllers. In Nancy K. Nichols and David H. Owens, editors, *The Mathematics of Control Theory*, pages 451–459. The Institute of Mathematics and Its Applications, Oxford University Press, 1992.
- [16] (With Hartmut Logemann.) Adaptive stabilization of discrete time infinite dimensional systems. In Uwe Helmke, Reinhard Mennicken, and Josef Saurer, editors, *Systems and Networks: Mathematical Theory and Applications. Volume II*, volume 79 of *Mathematical Research*, pages 767–768, Berlin, 1993. Akademie Verlag GmbH.

Thesis

- [17] *Zeros of sampled systems*. Master’s thesis, Department of Automatic Control, Lund Institute of Technology, 1982.
- [18] *The order of any stabilizing regulator is sufficient a priori information for adaptive stabilization*. Licentiate thesis, Department of Automatic Control, Lund Institute of Technology, 1985. (Identical with [2].)
- [19] *Adaptive Stabilization*. PhD thesis, Department of Automatic Control, Lund Institute of Technology, 1986.

Technical Reports

- [20] Pascal systems in Simnon. Technical Report TFRT-7278, Department of Automatic Control, Lund Institute of Technology, 1984.
- [21] Multivariable linear systems in Simnon. Technical Report TFRT-7281, Department of Automatic Control, Lund Institute of Technology, 1984.
- [22] Some CTRL-C-functions for manipulation of simple figures. Technical Report TFRT-7295, Department of Automatic Control, Lund Institute of Technology, 1985.
- [23] Perspective invariant markings—A geometrical approach. Technical Report TFRT-7301, Department of Automatic Control, Lund Institute of Technology, 1985.
- [24] CODEGEN—Automatic Simnon code generation for multivariable linear systems. Technical Report TFRT-7323, Department of Automatic Control, Lund Institute of Technology, 1986.

- [25] Automatic \TeX code generation from Macsyma and CTRL-C. Technical Report TFRT-7334, Department of Automatic Control, Lund Institute of Technology, 1986.
- [26] Hcopy2PS—Hcopy to PostScript filter. Technical Report TFRT-7335, Department of Automatic Control, Lund Institute of Technology, 1986.
- [27] Experiences with computerized document preparation tools. Technical Report TFRT-7336, Department of Automatic Control, Lund Institute of Technology, 1986.
- [28] Pascal and Fortran systems in VAX/VMS Simnon—A cookbook. Technical Report TFRT-7351, Department of Automatic Control, Lund Institute of Technology, 1987.
- [29] Problems in nonlinear control theory. Technical Report TFRT-7347, Department of Automatic Control, Lund Institute of Technology, 1987.
- [30] (Editor.) Lösningar till ‘Problems in nonlinear control theory’ (Solutions to ‘Problems in Nonlinear Control Theory’; in Swedish). Technical Report TFRT-7348, Department of Automatic Control, Lund Institute of Technology, 1987.
- [31] Documentation of MacEQ2 \TeX , DVILW, and Hcopy2PS. Technical Report TFRT-7352, Department of Automatic Control, Lund Institute of Technology, 1987.
- [32] Gnans — A program for stochastic and deterministic dynamical systems. Reference manual. Report 300, Institute für dynamische Systeme, 1993.
